Professional Summary

Full Stack Developer with hands-on experience in Chrome extension development, browser automation, and modern web technologies. Skilled in React, TypeScript, Node.js, and database management with MongoDB and Supabase. Proven ability to build scalable applications, integrate payment systems, and implement secure authentication solutions. Strong background in API development, real-time data processing, and user experience optimization.

Experience

TaskLabs July 2024 – Present

Full Stack Developer

- Developed a Chrome extension using React, TypeScript, and Redux to automate browser tasks and organize user content, boosting productivity and reducing tab-switching time by 30%.
- Designed a modular automation engine with Click Actions, Screenshot Capture, and Email triggers, Chat with site via Chrome APIs and MSG91, enabling customizable workflows for 100+ users.
- Engineered a Data Views component using Chrome APIs and JavaScript to scrape live stock/SEO/competitor data, used daily by traders for real-time decision making.
- Built an RPA (Robotic Process Automation) recorder with start/stop/replay features using JavaScript and Chrome DevTools Protocol, allowing non-coders to automate web tasks without writing code.

Education

Sagi Rama Krishnam Raju Engineering College (SRKREC) 2022 – 2026
Bachelor of Science in Computer Science GPA: 8.8/10

Bhimavaram, Andhra Pradesh

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Web Development

Projects

Student Community Platform | React.js, MongoDB, Express.js, Node.js

- Developed scalable community platform using MERN stack with secure user authentication, RESTful API, and real-time chat features, increasing daily active users by 40%.

Lokal Mitra | React.js, Typescript, FastAPI, Supabase

- Lokal is the AI-powered discovery and community platform for towns and cities — where locals share hidden gems, businesses go digital, and users get personalized food, news, and entertainment in one app.

Fill form with Ai | Chrome API, React.js

- An intelligent Chrome extension that automatically fills job application forms with your saved data. Save time by storing your information once and filling out forms in a single click!

Personal Portfolio with Admin Panel | React.js, TypeScript, MongoDB, Express.js, Firebase

- Built dynamic portfolio site with TypeScript and custom admin panel for content management.
- Implemented MongoDB backend with Express for real-time updates reflecting instantly on frontend.

Seating Management | ReactJS, TypeScript, Express.js, NodeJS, MongoDB

- Smart seating arrangement system helps students find their exam seats quickly and easily across colleges in India. It has an admin panel where the principal/HOD can upload the excel sheet/connect Gsheets of exam seating and students can easily access their exam place just by entering his Roll/Registration Number.

Technical Skills

Programming Languages: JavaScript, Python, TypeScript

Frontend Technologies: React.js, HTML, CSS, Redux

Backend Technologies: Node.js, Express.js

Databases: MongoDB, MySQL, Firebase, Supabase

Tools & APIs: Chrome API, Stripe API, Clerk Authentication, Git, MSG91
