Professional Summary

Full Stack Developer specializing in AI-powered applications, browser automation, and intelligent agent systems. Experienced in building Chrome extensions, autonomous AI assistants, and scalable web applications using React, TypeScript, Node.js, Python, and modern cloud technologies. Skilled in LLM integrations, API development, workflow automation, and developing self-improving systems that enhance user productivity.

Experience

TaskLabs July 2024 – Jan 2026

Full Stack Developer

- Developed cmdOS, a productivity-focused Chrome extension enabling users to execute commands, search the web, launch applications, and interact with AI assistants through a unified command interface.
- Built browser automation workflows with shortcut systems, tab management, and customizable actions to improve user productivity.

Cognizant Feb 2026 – Present

Frontline Engineer

- Analyze and resolve complex technical issues across Google Workspace environments by applying systematic debugging and troubleshooting approaches.
- Work with Google Cloud technologies including IAM, cloud services, and infrastructure configurations to diagnose and resolve platform-level issues.
- Apply Google Cloud fundamentals to improve reliability, security, and operational efficiency across enterprise environments.
- Achieved Google AGWA certification demonstrating expertise in Google Workspace administration, collaboration tools, and enterprise productivity solutions.
- Utilize Google Workspace administration concepts to investigate application behavior, configurations, and service integrations.

Education

Sagi Rama Krishnam Raju Engineering College (SRKREC) 2022 – 2026

Bachelor of Science in Computer Science GPA: 8.8/10

Bhimavaram, Andhra Pradesh

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Web Development

Projects

Vexa AI – Agentic Phone Automation Assistant | Kotlin, Android Accessibility API, Python, FastAPI, LLMs

- Built an autonomous Android AI assistant capable of executing real-world tasks by analyzing UI hierarchies and dynamically performing actions such as tapping, typing, and navigation.
- Developed an LLM-powered execution engine with self-learning memory using OKF (Open Knowledge Format) to adapt based on user behavior.
- Implemented self-healing automation workflows that detect UI changes and recover from unexpected execution states.

DOCK – Smart Browser Workspace Extension | Chrome API, React.js, TypeScript

- Built a Chrome extension that organizes frequently used websites, tools, and workflows into a customizable workspace for faster navigation.
- Implemented browser state management, quick actions, and productivity-focused UI components to improve daily workflows.

Student Community Platform | React.js, Node.js, Express.js, MongoDB

- Developed a MERN-based community platform with authentication, REST APIs, and real-time communication features.

AI Customer Support Agent | FastAPI, Gemini API, LangGraph, React

- Developing an AI agent using LLM workflows, tool calling, and RAG pipelines for intelligent knowledge-based responses.

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, Kotlin

Frontend Technologies: React.js, HTML, CSS, Redux

Backend Technologies: Node.js, Express.js, FastAPI

AI & Automation: LLM Integration, LangGraph, RAG, AI Agents, Browser Automation, Chrome Extensions

Databases: MongoDB, MySQL, Firebase, Supabase

Cloud & Tools: Google Cloud Platform, Google Workspace Admin, Git, REST APIs, Chrome API
